Planets in Aspect – The Soul’s Code Revealed
2 day Workshop Saturday 9th & Saturday 16th January 2016

Our Soul moves through lifetimes in an evolutionary process. Over the 30 years of my career as an Astrologer I have sought to understand the mystery of how our Soul ‘downloads’ its ‘program’ into our psyche, to set up our life’s journey, so we may heal old soul issues and ultimately release the healthy expression of our true purpose. I have discovered that it is actually the ‘aspects’ or relationships between the planets in the horoscope that provides the key information that links our soul & our psyche.

Please join me for both a practical and mystical 2 days together in January 2016 as we explore:

- How the planets are the many different ‘voices’ that comprise our psychological makeup
- The core themes and issues for each planet
- Aspecting the chart – step by step approach to reveal how the relationship of the planets or ‘voices’ sets the tone for the many divergent energies alive and operating in a person’s psyche. Some of these relationships are easy and positive, and some are difficult and challenging.
- How the aspects reveal the programming and create our unconscious emotional patterns
- How this links to our soul growth agenda
- How to re-program limiting patterns so they become functional and thus heal old Soul issues
- How we can ‘synthesize’ the many divergent components of our makeup
- Fun techniques for working with our ‘voices’
- Example charts with group members

By applying the concepts and tools from the various therapies a rich harvest of insight, understanding and solutions can be analysed from the Horoscope. Then we add the power of loving intention, intuition and genuine fascination in the process of healing and we have magical synthesis of left and right brain systems!
