

What does June 26th 2010's Lunar Eclipse have in store for us?

We are all used to hearing the term 'eclipse', but few of us really understand the true implications of these bi-annual connections between the Earth, her Moon, and our Sun.

We experience 2 'sets' of eclipses each year...6 months apart...and each set includes a Solar and a Lunar Eclipse... 2 weeks apart.

Now, as with all things planetary there is a 'cycle' to eclipses of 18 ½ years. In our own lives the years 18½, 37, 55½, 74...and so on, are pivotal moments in our "destiny unfoldment", as synchronization occurs between our 'potential', and our readiness to instinctively invite the correct people and situations to open this potential.

This is the idea at the very heart of Astrology...the study of the effects of planetary cycles upon the individual birth-chart. So it is this same principle we apply to any cycle for the 'collective' or global level.

Ancient people from all cultures were in awe of eclipses, as they coincided with major life changing signals in their world, sometimes including catastrophes! This is indeed exactly what they were...and still are! And we have a **particularly significant Lunar eclipse on the way on June 26th**.

A Lunar Eclipse happens at the full moon when earth blocks or 'eclipses' the light from the Sun...and this is all very symbolic and energetic, as the Moon's light is literally blocked! Thus the Moon's feeling instinctual nature on earth and in our lives is opposed or challenged by our ego...the Sun. The Moon is after all about water and feeling and flow and nurture...the Mother.

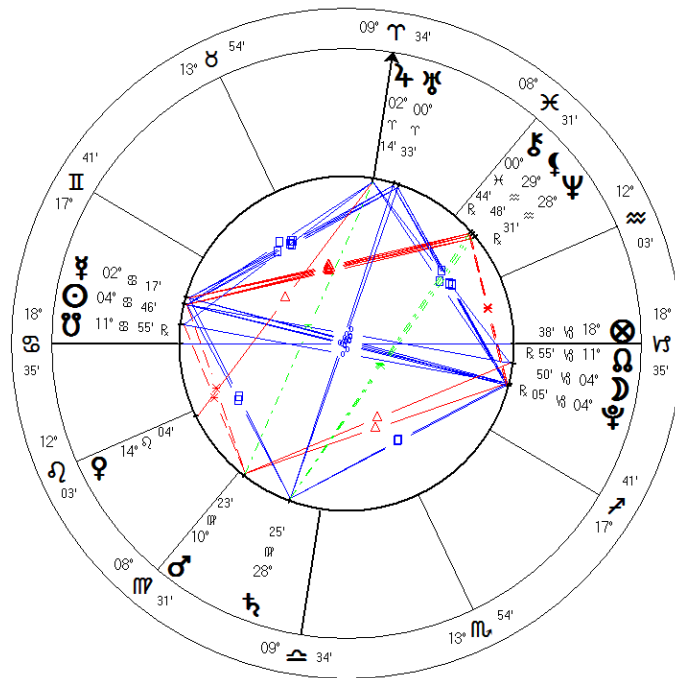

The effects of an eclipse cover a 6 month period, and can come into effect up to 2 months before and after the exact date of the alignment. And the Gulf Rig explosion occurred on April 20th. This is also the exact day that Chiron, planet of 'wounding' entered Pisces...sign of the fish...for the first time in 50 years.

The reason this Lunar Eclipse is so significant is due to an alignment with the planet Pluto...Lord of death and re-birth in our evolutionary process. The last time this happened was in 1987 when Pluto was in Scorpio, which brought us the Chernobyl Nuclear reactor disaster in Russia, and one of Pluto's rulership is of course Plutonium & Nuclear energy. The previous eclipse in this series was when Pluto was in Cancer in December 1916 at the outbreak of the Russian Revolution in the depths of WW1.

So is it any surprise that we are currently experiencing the greatest environmental disaster in modern history... on the water... via the unfolding BP oil rig explosion in the Gulf of Mexico. And nobody knows what to do about it because there is nothing they can do. Reports are coming to light over the past few days (June 19th/20th) of the volcanic nature of the undersea build up of toxic gasses due to the depth of the unsafe well that plunges 4.5 miles into the earth's crust. The potential for an explosive outcome is very real with subsequent Tsunami and super storms for the gulf region.

So a disaster of global proportions is potentially upon us, and we are powerless to deal with the forces of nature we have unleashed. Whatever the outcome, we are now finally confronted with the impact of our current selfish and destructive corporate systems.

Perhaps this is the 'disaster we have to have', because it is not until we physically see the results of the negligent actions of big business and their drive for profit in this profound way, we will ever begin to do something about it.

There is also a flood of 'corruption' stories coming from all points of the globe, as politicians fall from power through sexual and financial exposés, plus the next stage of the global financial crisis hotting up in Europe, as more countries demand trillion dollar bailouts after the excesses of debt in the past decade. Not good indeed. The old system is falling and the bandaids are coming unstuck.

Pluto has a 246 year cycle...yes a big one. Thus we see his impact in each of the 12 Zodiac signs as tremendous chunks of our history. He brings about Renaissance eras when new phases emerge to morph us out of old paradigms and into new ones. As God of the Underworld his rulerships involve the 'depths'...of our own unconscious and our world ecosystems.

He entered Capricorn, sign of corporate and sovereign governance in **January 2008**, and almost immediately the wheels fell off the financial train with the sub-prime crisis. His previous visit to Capricorn in the 1760s/70s brought us the French Revolution, American War of Independence and birth of the Industrial Era.

The other planetary cycle entering the fray in the past 2 weeks is **Mr Revolution himself Uranus entering the sign of Aries**. This marks the birth of a new 84 year cycle and brings us echoes of 1927 through 1935 which brought us the great depression, huge strides forward in industry and the rise of the fascist dictators in Europe and Japan. On June 7th he was joined by expansionary Jupiter at zero degrees Aries for the birth of his new 12 year cycle.

Thus Uranus conjunct Jupiter in Aries forms a challenging connection with the Lunar Eclipse and Pluto in Cancer and Capricorn. These are alignments of major energetic forces to say the least, and they contain both difficult and positive potentials. On the down side we have the 'boys' responsible for chaotic shifts and changes that force us to react, whilst on the

upside they offer us the opportunity to bring in a new phase of massive positive developments in the sciences and technology, which will cause an unprecedented evolutionary leap. This aligns wonderfully with this Saros Cycle 12 South that began in 1541, which birthed the dawning of the Scientific revolution that was sparked by Nicholas Copernicus and his Heliocentric theory.

Personally we are challenged to release old conditioning that is limiting our 'emotional and physical safety', as we also say yes to this brand new world phase and activate new enterprises in our lives. It is essential not to buy into the fear, but rather take positive action toward protecting your family and environment. Huge numbers of us are making changes right now as old relationships that do not serve us are released and new positive ones are forming.

Aries brings us the principle of pioneering and adventure, and Jupiter and Uranus are calling us to our brave and courageous Hero within. Dare to step out and forward over these coming months with faith in your own ability to transform and regenerate your life and the world.

Maggie Kerr June 23rd 2010

Belonging to Brady's Saros Cycle 12 South that began in 1541 we saw the dawning of the Scientific revolution that was sparked by Nicholas Copernicus and his Heliocentric theory.
